Connecting to the AirBears Wireless Network

Your wireless card should automatically select AirBears. If not, you will need to change your network to AirBears before continuing.

1. Open your web browser and direct it to any webpage; it should automatically redirect to the AirBears login page. If not, direct your browser to http://wlan.berkeley.edu/login/

2. Click Guest Account button

3. Enter the Guest Account Username ("guest-########") and Password provided. Note: password is case-sensitive, and number one (1) and lower-case L (l) look very similar on paper.

Wi-Fi coverage varies from room to room within the building. If you lose connection, repeat these steps to reconnect.
